Expertise

- RF & wireless communication
- Signal processing
- Satellite communication
- Antennas & propagation
- Embedded systems
- IoT & monitoring

Tools & systems

- Linux
- MATLAB
- HW/SW integration
- Data acquisition & processing
- Systems administration
- Network services

Certification

TXOne Certified Solutions Specialist

TXOne Networks

Dec 2024 – Dec 2027

Language

English

Professional working proficiency

About Me

MSc graduate in Communication and Information Technology, with honours, focused on wireless communication, RF engineering, signal processing, IoT and embedded systems. Experienced in taking smaller systems from design and measurement through hardware/software integration, data acquisition and operation.

Professional Experience

Feb 2022
–
Present

IT Support Specialist

VSB – Technical University of Ostrava

- Receive, resolve and route technical support requests for university staff and students.
- Support users in Czech and English by email and phone, with involvement in systems administration and network services.

Selected Projects

Oct 2025

IoT CubeSat Telemetry Receiver

VSB space research • Master's thesis

- Developed a gateway that receives and processes telemetry from orbiting CubeSats and a VSB CubeSat under development.
- The project received an extraordinary scholarship.

2024

LoRaWAN Communication in the 433 MHz Band

Bachelor's thesis • VSB-TUO

- Compared operation in the EU433 and 868 MHz bands through endpoint integration, link-budget analysis, range simulation and field measurements.

Education

2021
–
2026

Communication and Information Technology

Master's degree (Ing.) • VSB-TUO

- Graduated with honours.
- Focus on communication networks, mobile and radio communications, optical communications and sensors.

2017
–
2021

Computer Applications and Network Administration

SPŠ ELIT Dobruška
